Step # 1

Emailed software

Once you have requested new software or updated software from JET's Service department service@jetgamesusa.com you will receive an email from a transfer site. This is because the software files are too large to send by email. Once you open the Email you will see the picture to the right. Click on "GET Your Files"

Step # 5

Checking the files on the Thumb Drive

Once the files have been transferred to the Thumb drive make sure they appear as they do to the right. One files should show "ini" and the other should be "syupdate" once this is confirmedthat both files are correct and the "syupdate" file is still zipped you are ready to start the download on the game.

INSTALLATION INSTRUCTIONS

Step # 6

Installing the files on the game computer

Locate the Computer in the game and install the Jump Drive into the computer with the power off. Once the power is turned on the game should automatically load from the thumb drive. ******NOTE: If this does not happen you might need to go into BIOS on the computer with a keyboard and Mouse. Select boot options and set boot priority #1 to the USB Jump Drive. Then save and restart.**
