

Game software file update

1. Unzip the downloaded file "PirateGame.zip"
2. Plug in the USB keyboard and mouse onto the computer main unit of the game console.

3) After the game console computer is powered on, pressing the WIN key will display the taskbar. To close two running programs, you can either press ALT+F4 on the keyboard or use the mouse to do so. After closing them,

4) Copy the "PirateGame" folder obtained after decompression to the computer mainframe of the cannon gun machine, located at [C:\CannonGame](#), to overwrite the existing files. After completion, shut down the machine and restart it.
